

MBA/MSE EE PARTNERSHIP WITH THE IRA A. FULTON SCHOOLS OF ENGINEERING

Combining advanced courses in electrical engineering with a rigorous management curriculum, the MBA/MSE concurrent degree is unique among online MBA programs. You emerge with two degrees from highly regarded schools in their respective fields: the W. P. Carey MBA and the Master of Science in engineering with a concentration in electrical engineering from the Ira A. Fulton Schools of Engineering.

A concurrent degree can be earned in a shorter period of time and at a lower cost than if the two degrees were pursued separately. Offered online, the MBA/MSE concurrent degree requires 56 credit hours of study over three years, including eight courses from the MBA program and eight courses from the MSE program.

Concurrent degrees are only available to students beginning the Online program in August.

Highlights

- Designed for working professionals who have an undergraduate degree in electrical engineering and at least one year of work experience
- Choose from five focused electrical engineering tracks:
 - Electric power and energy systems
 - Electronic and mixed-signal circuit design
 - Electromagnetics, antennas, and microwave circuits
 - Signal processing and communications
 - Solid-state electronics
- A capstone MBA course and a comprehensive MSE exam that integrate course information across the curriculum

Special Admissions Information

Entrance to the program is contingent upon meeting all normal requirements of the Office of Graduate Education, as well as the competitive admissions requirements of the W. P. Carey MBA and the Ira A. Fulton Schools of Engineering MSE in Electrical Engineering programs.

Only one application is necessary for both programs, and it must include answers to three essay questions and a current resume. In addition, two letters of reference and official transcripts should be submitted directly to the Office of Graduate Education. GMAT

scores are required for the MBA application. GRE scores may be accepted. Contact an admissions representative for further details.

Admissions requirements include at least one year of professional work experience; two year preferred. Undergraduate degrees from ABET-accredited electrical engineering programs require a minimum 3.0 GPA for the last two years of study. Non-ABET electrical engineering degrees require a minimum GPA of 3.5 for the last two years of study or first class with distinction and a GRE quantitative score above the 90th percentile.
